

## Anti-Microbial 'AM' fills

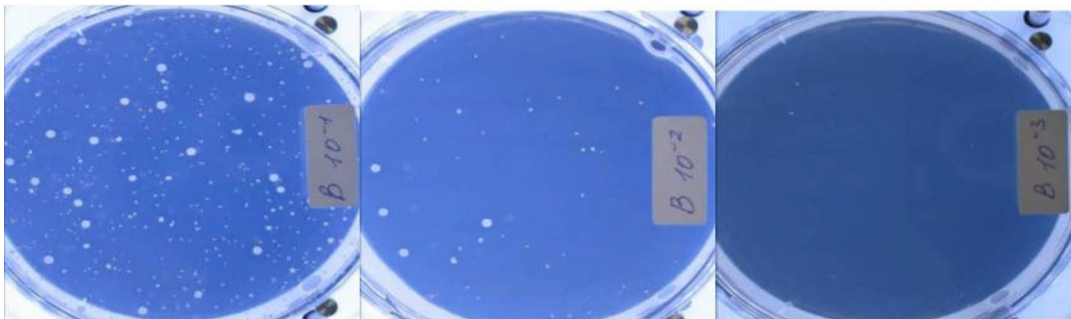

Special additives create an 'acid'- surface at the plastic surface against bacteria (incl. legionellas)

further advantages are:

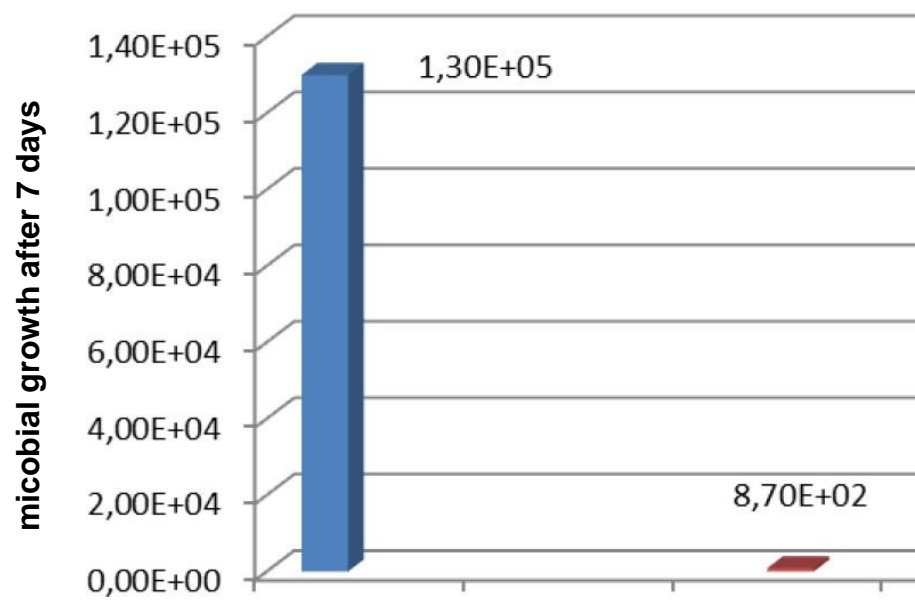

- Hewitech 'AM' : available in the main fills and droplet eliminators
- safe additives : environmental approved
- no HEMMHOF! , because of insoluble additives
- long lifetime , mixed in the raw material

International test-method: JIS - Z 2801

Bacteria reduced in the petri dishes during time

## Example for biological activity of plasticsJIS –Z 2801

Hewitech – 20 years’ experience with welded PP film cooling fills
